

BORROMEO

Arch. Maurizio Di Mauro

DESCRIPTION

In Borromeo - available in both rectangular and round version - everything contributes to create eye-contact between guests: the particular shape of its top ensures that diners sit along a curve instead of a straight line - which pleasantly facilitates eye contact while the legs of the table play forming an interesting design and joining one to another thanks to a central connecting element. Besides, its top can be customized with a central decoration in painted glass, essence or marble.

TECHNICAL INFORMATION
