

MONFORTE

Maurizio Di Mauro architetto

DESCRIPTION

Monforte is fantasy of wood and marble. A symphony that bursts in the game of its legs giving life - in their two variants - to two completely different faces of the same coffee table. The first more cheeky, with wooden feet that turn outside. The second with a more intricate weave of the legs that form a single body incorporated in the center to support the top. Even the top can change decisively in the two round rectangular proposals, with lacquered with a glossy or matt finish, or in marble in the various types of the MC collection.
