SOLFERINO | SOLFERINO LARGE | SOLFERINO 7

Maurizio Di Mauro architetto

DESCRIPTION

Its lines are original and of a vaguely retro style: Solferino is designed to adapt to ambiances having a brilliant soul, to bring color and a touch of fantasy. It is a practical and space-saving bedside table with two drawers characterized by a particular solid wooden foot, which slightly protrudes from the structure. Almost infinite combinations can be obtained by varying the three customizable elements: legs, external structure and front of the drawers. Solferino 7 takes inspiration from its twin chest of drawers and to the style of the 50s.

TECHNICAL INFORMATION

Typology

Bed side table
