## VIA DURINI

Maurizio Di Mauro architetto

## DESCRIPTION

---

Lighthearted and original, spacious and welcoming: Via Durini is a chest of drawers with multiple personalities that, as such, are ready to adapt to the peculiarities of yours. Its three drawers draw original lines, creating a body supported by a particular solid wood foot: you can obtain many combinations varying its legs, structure and front of the drawers. Have fun discovering how its mood changes just reversing its lacquered and wooden finishing between the front and the top: from a bold chest of drawers you'll get a more traditional one.
