ARMCHAIRS

*David Chipperfield*

## Description

For this project Chipperfield was particularly concerned with finding versatile, robust seating which would meet rigorous usage requirements while conveying a sense of refined luxury. It is planned to finish the museum seating in leather. This line of research has been combined with another theme that Chipperfield was keen to explore; that of obtaining comfortable soft seating from thin upholstered sections applied to a light and dynamic structure, using advanced industrial production techniques.

---

## Technical information

### Internal frame:

tubular steel and steel profiles

### Internal frame upholstery (PO67):

Bayfit® (Bayer®) flexible cold shaped polyurethane foam, shaped polyurethane, polyester fibre cover

### Internal frame upholstery (PO62-PO62W):

Bayfit® (Bayer®) flexible cold shaped polyurethane foam, polyester fibre cover

### Lower edge:

bright brushed aluminium

### Rear wheels (PO62W):

black colour plastic material

### Ferrules:

thermoplastic material

### Cover:

fabric or leather in limited categories
